

We have produced more than 2,272,00 kW/h since 2011, all from renewable energy sources.

In 3 years, we've avoided producing emissions amounting to over 1,000 tons of CO2:

In 9 of our 70 branches in Italy, the photovoltaic panels we've installed cover over 5,000 sq m and generate 673 kW/h

- | Branch | Area (mq) | Energy Production (kW/h) |
|------------|-----------|--------------------------|
| 1 Lodi | 1642 | 193 |
| 2 Modena | 848 | 99 |
| 3 Milan | 641 | 75 |
| 4 Brescia | 516 | 60 |
| 5 Pisa | 494 | 58 |
| 6 Parma | 422 | 49 |
| 7 Pescara | 408 | 48 |
| 8 Piacenza | 375 | 44 |
| 9 Mantua | 375 | 44 |
